Several approaches used by our practitioners:

Chiropractors apply Level 5 ointment to the neck and lower back of their patients with pain caused by sports injury or due to sedentary occupational roles.

Massage therapists regularly uses Level 3 massage oil for deep tissue massage. Her patients report less achiness following treatment because of the analgesics in the oil. They leave her table feeling significant relief.

Acupuncturists use Level 2 cream for aftercare to take advantage of the added synergy effect of Arnica on the body.

Registered nurses report massaging a small amount of a Level 4 ointment onto a patient's knees for post-op care. They also report of significant pain relief while using the product as a day-to-day treatment.

Dentists uses Level 1 cream to numb painful jaw ailments. They apply a small amount to the jaw to loosen hypertonic muscles, without the accompanying fragrances.

Podiatrists rubs the Level 5 Pain Stick along the plantar fascia for foot strains, using this product to massage and loosen tissue while keeping their hands clean.
